

The **eLITE™** Series of Ground Power Units from Hobart set a new industry standard for fuel efficiency and low emissions. This compact sized family of GPU's saves space, provides clear line of sight and gives easy maneuverability on the ramp. The **eLITE™** Series features large lift-off doors that provide easy access for service and maintenance. The **eLITE™** Series includes a 60kVA and 90kVA 400Hz – 115 VAC and the 28.5 VDC JetEx® engine drive unit. The **eLITE™** Series GPU's are the most efficient and environmentally friendly ground power units in the world.

eLITE™ Series

- Reliable:** The **eLITE™** Series GPU line is designed and manufactured with the same excellence that has allowed the industry to rate Hobart Ground Power's units #1 for reliability.
- Efficient:** Running 25% more efficiently than current models, the **eLITE™** Series GPU line offers savings in excess of \$10,000 per year in fuel expenses.
- Emissions:** Low fuel consumption, combined with the Tier 3 Cummins diesel engine, significantly reduces the overall carbon footprint of the unit.
- Compact:** Low profile design provides a clear line of sight for one person maneuverability and saves precious ramp space around the aircraft.
- Ease of Use:** Simple, one button start provides user friendly operation to expedite aircraft turn around time.
- Serviceability:** Hobart SENTRY digital control system provides enhanced diagnostics and monitoring of the unit. Large doors provide ready access for service and maintenance.
- Quiet Operation:** Running at a lower RPM the **eLITE™** Series operates at less than 80 dBA.

Hobart Ground Power is the world's leading supplier of reliable ground support equipment. Based in Troy, Ohio, USA, the Company has provided over 50,000 GPU's since 1946.
